OPEN SKY GALLERY

view from Wan Chai

view from the Peak

view from Central

The ICC façade consists of 77,000 square meters of display space, of which each line of white LEDs are positioned roughly 4 meters apart from one floor to another. (140 lines in total)

- The North side of the façade is permanently darkened at all times.
- Upper part of the building has doubled amount of LEDs, making patterns clearer to see.

The show is pre-programmed and real time playing is not possible.

Suggested duration per work is about 2 minutes.

The Video should be Black & White

Specification

NOTE: The final video would look something like this.

Submission File Format

.mov (quicktime)

Recommended video size - 150MB or less

Recommended framerate

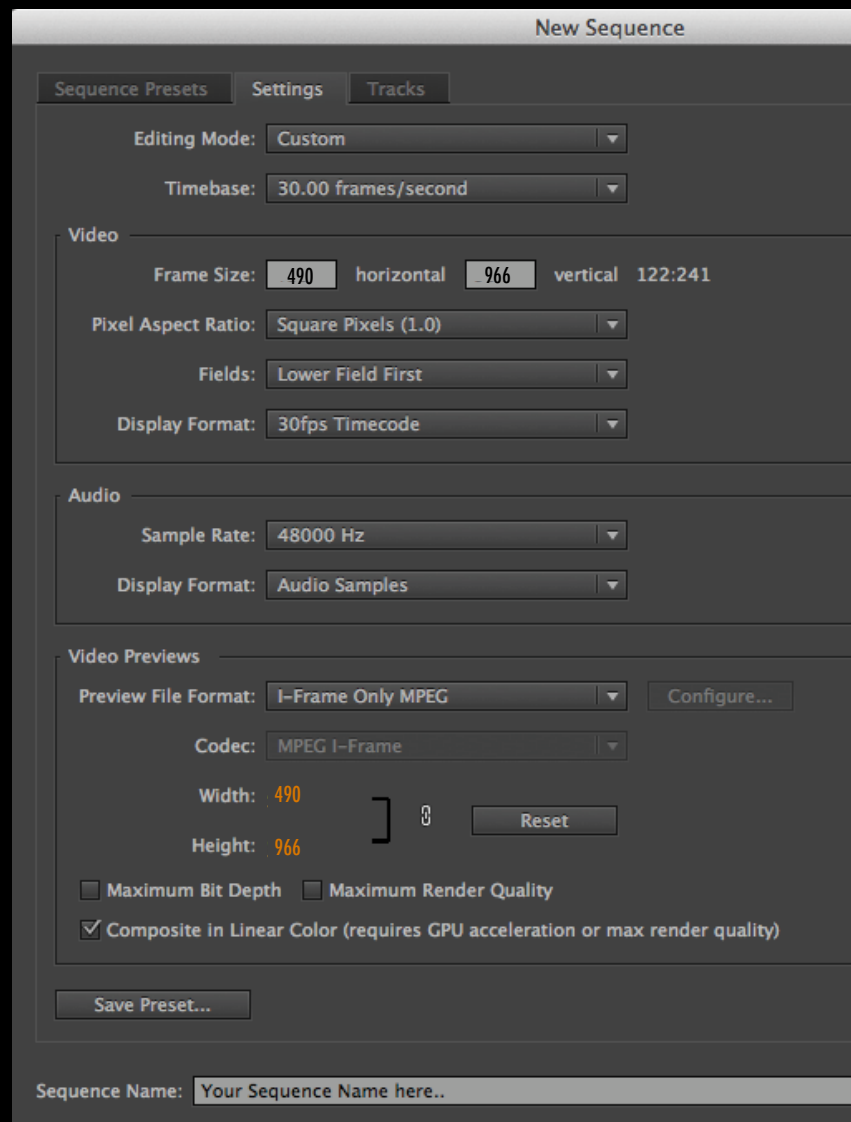

25 fps

Video/Animation Dimension

490 x 966 px (final video dimension)

359 x 783 px (Actual video frame)

Video exporting hints

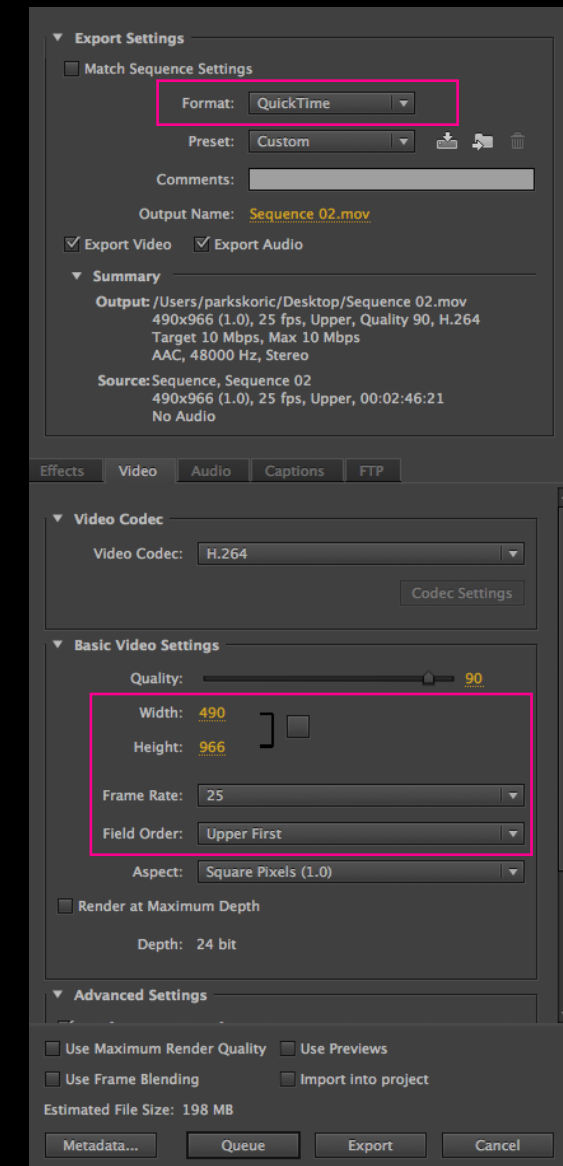

1. Create sequence with dimension of 490 x 966 px

2. Use mask file to determine position of the video (remember to leave the North portion black)

3. **Remove mask** for final export to Media

4. Adjust export setting to Quicktime video, and ensure video size is 490 x 966 px

Also, ensure frame rates of source & output videos are consistent.

For best results, use the simulator to test for optimum visibility
